

Connecting and reporting

Use of connecting and reporting words in academic writing

In academic writing, it is important to present an argument logically and cohesively. In addition, you may be required to report on, evaluate and discuss existing research or ideas. Often you will be assessed on your ability to do both.

Developing the language that you use to report on and connect ideas in academic writing will help you with both these tasks. The appropriate use of 'connectives' that is, words or phrases that signal a connection, can reveal and reinforce the direction that your argument is taking and the relations between sections of your writing.

Experienced writers use connectives to bridge gaps between ideas that may seem unrelated. Also, carefully chosen 'reporting words' will communicate your assessment of other authors' theories/research and the authority they carry. Using a range of reporting and connecting terms will add variety and interest to your writing. It will also give it an appraising and constructive tone, which will improve the quality and depth of your argument.

This pamphlet provides some suggestions for sentence openers, 'linking words' within sentences and between paragraphs, and alternative verb choices you might use when reporting on other writers' ideas.

Connectives used in and between sentences

Connectives allow us to be more precise about the relationships between statements in a sentence or between sentences. Particular phrases and words serve different functions in connecting ideas and arguments. For example, different clauses or words can signal or 'signpost' additional or similar information, opposition or contrast, concession, cause or effect, provide emphasis, clarification, or a relationship in time or sequence. Below are some useful examples of each.

*E.g.: The Melbourne Cup is Australia's most famous race. **In fact**, most of Australia will stop what they are doing to watch or listen to it.*

Clarification	in particular, specifically, to put it another way, namely, for example, in other words, such as
----------------------	--

*E.g.: The Melbourne Cup is Australia's most famous race. **In other words**, this is the one race that everyone in Australia knows about.*

Time relation or sequence	first, second, third (etc), next, before, later, earlier, subsequently, while, then, meanwhile, finally, to conclude, given the above, following
----------------------------------	--

E.g.: Although the Melbourne Cup is Australia's most famous race, the AFL Grand Final is also very well known.

Connectives as sentence or paragraph openers

While paragraphs should each have a particular topic, they should also be connected so that there is a clearly defined line of argument throughout your writing. The opening phrase or word of a sentence or paragraph can be particularly effective in 'signposting' to the reader the direction your argument is taking and the links between ideas. Use of the following 'linking words' can help establish how a paragraph or sentences within a paragraph relate to the ones preceding it.

<p>TO ADD AN IDEA</p> <p>In addition Another reason/aspect/example Furthermore Moreover</p>	<p>TO MAKE A TENTATIVE STATEMENT</p> <p>Studies suggest that Perhaps It would seem that It tends to be the case that</p>
<p>TO INTRODUCE A CONTRAST</p> <p>Compare this with In contrast However In spite of Although Notwithstanding Even though</p>	<p>TO INTRODUCE A RESULT</p> <p>Accordingly As a consequence As a result In view of the above</p>
<p>TO GIVE AN EXAMPLE</p> <p>For example An example of this is A further instance of this is</p>	<p>TO INTRODUCE A LOGICAL CONCLUSION</p> <p>Thus Therefore It could be concluded that Consequently Finally</p>
<p>TO POINT TO EVIDENCE</p> <p>It can be seen that The evidence is that In support of this</p>	<p>TO CONCLUDE</p> <p>In conclusion To sum up To review</p>

Reporting words
