2007 International Baccalaureate Combined Rank and Notional ENTER table

The Australasian Conference of Tertiary Admissions Centres (ACTAC) has agreed on, and passed to the IBO for communication to all Australian IB schools, the table to convert 2007 IB results for 2008 university admissions in New South Wales & Australian Capital Territory, Queensland, Tasmania, Victoria and Western Australia. This conversion table, together with the Extension Study increments in terms of ENTER points is provided as the 2007 Combined Rank and Notional ENTER table.

The combined rank is based on the following weightings and state conversion tables:

- The IB population weightings used were the estimated IB Diploma candidate numbers for 2007, as provided by the IB Regional Representative - Australasia, with ACT and NSW treated as a single entity and NT and SA treated as a single entity. The Victorian weighting was therefore 52.47, with the SA/NT weighting being 22.55 and the NSW/ACT weighting being 24.98. (These states accounted for over 94% of the Australia wide IB population.)
- The state ranks used in the calculation were the 2006 rank tables from NSW and SA and the rank table from Victoria using the 2004-2006 local VCE with a LOTE and 2004-2006 local IB results but with no base-line in place.

Since Victorian students may simultaneously complete an approved Extension study, Extension study increments are also shown. The table below gives the 2007 Notional ENTERs corresponding to the various passing IB scores both with and without a successfully completed Victorian University Extension Study at the appropriate level.

| 2007 Passing IB Score including bonus points | Combined Rank / Notional ENTER | Notional ENTER with a Low Extension Study Result | Notional ENTER with a Medium Extension Study Result | Notional ENTER with a High Extension Study Result |
